

Lace!

Lace has been a sign of style and elegance since the 16th century.

Fine luxury garments to machine-made fashions for the everyday.

Here you can see examples of clothes made of lace and a lace detail.

Have a go at designing with lace!

You will need: card, tissue paper, paper doilies if you have, or thin paper that you can fold! I used yellow wrapping paper.

Here's how:

- Choose a piece of card for your background.
- If you are using a paper doily cut it into shape for your design.
- Or if you would like to create a lacy pattern you can do this much like you would make a snowflake to decorate in December!

To make your lace:

- Take a piece of paper and fold it up and then start to cut small shapes along the edges. The more you cut the more lacy your design will be.
- You will finish with a lacy design when you open it out.
- Use your design to make into your outfit. Cutting shapes out and added more details with ribbons, sequins or buttons if you have them.
